LEHD

(Longitudinal Employer-Household Dynamics, Census Bureau)

<http://lehd.ces.census.gov/>

"The Longitudinal Employer-Household Dynamics (LEHD) program is part of the [Center for Economic Studies](#) at the [U.S. Census Bureau](#). The [LEHD program](#) produces new, cost-effective, public-use information combining federal, state, and Census Bureau data on employers and employees under the [Local Employment Dynamics \(LED\) Partnership](#). State and local authorities increasingly need detailed local information about their economies to make informed decisions. The LED Partnership works to fill critical data gaps and provide indicators needed by state and local authorities."

BatchGeo

<http://batchgeo.com/>

"Maps tell a story, see what you're missing.

We love maps, and we think they should be easy to make - that's why we made BatchGeo. It's the fastest way to create Google maps from your data. It accepts addresses, intersections, cities, states, and postal codes. We do the hard work of figuring out where all your data lives in the real world."
